

ROLAND CLARK
Technical & Hospitality Rider

Artist: Roland Clark

Technical Rider

DJ Equipment

- Two (2) Pioneer CDJ-3000's media players, linked together.
- One (1) Pioneer DJM-V10 six-channel DJ mixer. A Pioneer DJM-900NXS2 is acceptable if the DJM-V10 is unavailable.
- Roland will perform using USB memory devices. All players must be fully tested and configured for USB playback before soundcheck.

DJ Booth Layout

Required order, from left to right: CDJ 1 – Mixer – CDJ 2. If a third player is supplied, place CDJ 3 to the right of CDJ 2.

The DJ booth must be stable, level, clean, and large enough to accommodate all equipment safely, with adequate space for cabling and ventilation.

Monitoring

- Provide one (1) high-powered, clean, undistorted DJ monitor system with independent volume control.
- Position the monitor at approximately ear height, to the side or front of the DJ booth. Do not position monitors behind the artist.
- The monitor system must provide sufficient headroom for clear monitoring at performance level without distortion.
- One waist high length sitting stool

Audio & Technical Support

- All equipment, audio connections, network links, power supplies, and booth monitors must be installed and fully tested before the artist's arrival.
- One (1) qualified sound technician must be present before the set and remain on duty throughout the performance.
- Reliable Wi-Fi access must be provided to Roland upon arrival at the venue.

Advance & Substitutions

Any proposed equipment substitution or change to the booth layout must be approved in advance by the artist or artist representative. Please notify the artist representative promptly if any listed requirement cannot be met.

Hospitality Rider
